

## Ruby master - Feature #10489

### Add inherit method for clearer and multiple inheritance

11/09/2014 01:57 AM - brauliobo (Bráulio Bhavamitra)

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>	matz (Yukihiro Matsumoto)	
<b>Target version:</b>	Next Major	
<b>Description</b>		
A new and more intuitive syntax:		
<pre>class B end class A   inherit B end</pre>		
Instead of (but keeping this for backwards compatibility):		
<pre>class B end class A &lt; B end</pre>		
Besides, this allows multiple inheritance. Also, inherit could be implemented with just extend plus include?

Module is "multiple inheritance" for ruby. I don't think it is a good idea.
