

## Ruby master - Feature #11305

### [ipaddr] include the IP address in question within the InvalidAddressError exception message

06/25/2015 04:25 AM - postmodern (Hal Brodigan)

<b>Status:</b> Open	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Target version:</b>	
<b>Description</b> The ipaddr.rb library has a rather complex and custom parser. If an IP address fails to parse, it will raise an InvalidAddressError from one of its many parsing methods. The IP address should be included in the exception message for context.	

#### History

#1 - 06/25/2015 04:25 AM - postmodern (Hal Brodigan)

- Subject changed from include the IP address in question within the InvalidAddressError exception message to [ipaddr] include the IP address in question within the InvalidAddressError exception message
