<b>Target version:</b>	
<b>ruby -v:</b>	<b>Backport:</b>
<b>Description</b>	
Hi All,	
I install the calabash-android. If the Chinese is included in the feature file, which is as below: Feature: Login feature Scenario: As a valid user I can log into my app When I press "登录" Then I can see "Not login interface"	
It occurs the ruby crash when I execute the command calabash-android run xxx.apk. I have tried install the ruby 1.9.3, ruby 2.0 or ruby 2.3. The problem is same. My OS is win7-32 or win7-64.	
What is the problem and what should I do that I can use the calabash-android tool?

- Tracker changed from Backport to Bug
- Project changed from Backport22 to Ruby master

Hello, clint.

Could you provide full error messages in your command prompt?

##### #2 - 11/03/2015 06:56 AM - clintming@qq.com (clint ming)

- File RubyLibInstalled.jpg added

Where I can find more log information when it occurred? I can only find the error info on dos screen. Attachment is the ruby lib I have installed
