

## Ruby master - Feature #11987

### daemons can't show the backtrace of rb\_bug

01/13/2016 10:38 AM - naruse (Yui NARUSE)

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Target version:</b>		
<b>Description</b>		
Ruby shows backtrace and other information into stderr on rb_bug. But daemon process redirects stderr into /dev/null. How do I get the log?		
NOTE: if I can reproduce this, I can use strace to get it. But issues are not always reproducible.

I always recommend pointing stderr to a regular file using  
IO#reopen after daemonization. Perhaps kwargs may be added  
to Process.daemon to encourage this usage?

Process.daemon err: '/path/to/stderr.log', out: '/path/to/stdout.log'
