

Ruby master - Feature #12064

Make creation of enc/unicode/casfold.h automatic again

02/12/2016 06:13 AM - duerst (Martin Dürst)

Status:	Open	
Priority:	Normal	
Assignee:	nobu (Nobuyoshi Nakada)	
Target version:		
Description		
<p>The creation of enc/unicode/casfold.h has been moved to a special make target, 'unicode-up', in r53771, to avoid CI failures on platforms that don't have gperf. This should be changed so that enc/unicode/casfold.h is produced automatically if gperf (version 3.0.4) is available. (Of course, this should only happen if the files used for the production are newer than the target file.)</p>
