| Description | |
| Using chop! can mess up the final line of input because it may not end in a line-end character. | |
| <pre>printf a\\nb\\nc ruby -lne 'p \$_' "a" "b" ""</pre> | |
| <pre>\$ printf a\\nb\\nc\\n ruby -lne 'p \$_' "a" "b" "c"</pre> | |
| Using chomp! works correctly in both cases. | |
| <pre>\$ printf a\\nb\\nc ruby -ne '\$_chomp!; p \$_' "a" "b" "c"</pre> | |
| <pre>\$ printf a\\nb\\nc\\n ruby -ne '\$_chomp!; p \$_' "a" "b" "c"</pre> | |

I'd consider it a bug.

OK, accepted

This is because -l is older than chomp.
