

Ruby master - Bug #14402

Crash and coredump (Stack consistency error) on ruby 2.5.0

01/25/2018 04:39 PM - jrochkind (jonathan rochkind)

Status: Closed	
Priority: Normal	
Assignee:	
Target version:	
ruby -v: ruby 2.5.0p0 (2017-12-25 revision 61468) [x86_64-darwin16]	Backport: 2.3: UNKNOWN, 2.4: UNKNOWN, 2.5: UNKNOWN
Description	
<p>This reproduction script seems to make no sense, because it's extracted from an actual program where I encountered this bug, and trimmed down to be the minimal I can get to reproduce.</p> <p>Parts of the script that seem irrelevant (like the if check that should never be true), if removed, remove the reproduction. This is why I'm glad I'm not a C programmer!</p> <p>This executes without core dump on ruby 2.4.3p205 (2017-12-14 revision 61247) [x86_64-darwin16] -- runs fine, does not reproduce error, on 2.4.</p> <p>I believe on ruby 2.5 it also reproduces on travis (which is where I originally encountered the problem), so I don't believe it is unique to the MacOS ruby build I am reporting here.</p> <p>Console output at: https://gist.github.com/jrochkind/0e6ed450414f4577bdb886961e4d61ba</p> <p>Crash report log file from ~/Library/Logs/DiagnosticReports/ruby_2018-01-25-113636_170220-C02T63QEFVH4.crash at: https://gist.github.com/jrochkind/6cbd60845cf36352491fb6d058ea2910</p>
