

Ruby master - Bug #14597

Ripper Issue - introduced between 62674 & 62681

03/11/2018 06:33 PM - MSP-Greg (Greg L)

Status: Closed	
Priority: Normal	
Assignee:	
Target version:	
ruby -v: ruby 2.6.0dev (2018-03-07 trunk 62681) [x64-mingw32]	Backport: 2.3: UNKNOWN, 2.4: UNKNOWN, 2.5: UNKNOWN
Description <p>The following code generates a Ripper FATAL stop. 62674 is okay, but 62681 errors. Possibly #62675 parse.y: tSPACE for old bison?</p> <pre>require 'ripper' str = '* The \ must be doubled if not followed by white space: \\. ' tokens = Ripper::Lexer.new(str).lex # Error here puts tokens.inspect</pre> <p>I don't know whether this is considered a bug. YARD uses Ripper for both parsing rb files and also for syntax highlighting of any indented comment block. This is part of a comment block contained in lib/rdoc/markup.rb.</p> <p>This has parsed without error for quite a long time on my doc site, https://msp-greg.github.io/, which contains Ruby, AWS, Rails, and a few other items. I mention it just because it probably contains quite a few indented comment blocks that are not ruby code.</p> <p>Or, said another way, I can see how Ripper should not be expected to never error on arbitrary strings passed to it, but it has done so for quite a bit of content for quite a long time...</p> <p>Sorry for the delay in posting, and thanks, Greg</p>
