

Ruby trunk - Bug #15655

Unable to handle Russian dirname on Windows

03/11/2019 10:08 AM - ashmaroli (Ashwin Maroli)

Status: Open	
Priority: Normal	
Assignee:	
Target version:	
ruby -v: ruby 2.4.5p335 (2018-10-18 revision 65137) [x64-mingw32]	Backport: 2.4: UNKNOWN, 2.5: UNKNOWN, 2.6: UNKNOWN
Description I'm unable to work in a directory with a Russian name. Running bundle exec ... returns an error from Bundler saying that it couldn't locate the Gemfile (which is present) <pre># print current directory > echo %CD% => D:\Евгений # print contents at root > ls => 404.html Gemfile _config.yml _posts about.markdown index.markdown # List dependencies via Bundler > bundle show => Could not locate Gemfile or .bundle/ directory # Debug in IRB > irb irb(main):001:0> Dir.pwd => "D:/???????"</pre>
