<b>Target version:</b>		
<b>ruby -v:</b>	2.5.5	<b>Backport:</b> 2.4: UNKNOWN, 2.5: UNKNOWN, 2.6: UNKNOWN
<b>Description</b> At first I have 2.5.3 and 2.6.0 which are working fine. Then I started to encounter errors in Heroku after deployment, I tried installing Ruby 2.5.5 since that is the supported version in Heroku in order to replicate the problem. After that I am also encountering the same problem on my local computer, even if I tried to use different version (via RVM in MacOS), the error still persists.
