- Description updated

#2 - 01/07/2020 02:18 AM - duerst (Martin Dürst)

- Status changed from Open to Third Party's Issue

Given that <https://github.com/piotrmurach/tty-prompt/issues/115#issuecomment-557919189> says that the tty-prompt library uses a native C API, and this issue can only be reproduced on Windows, I strongly suspect this is an issue in tty-prompt, not in Ruby itself.

If that's not the case, please reopen with actual details in this tracker, not just a pointer.
