Description After this commit: https://github.com/ruby/ruby/commit/9be3295d53b6fd9f8a3ad8157aa0655b1976d8ac -- RDoc loses documentation attached to OpenStruct class, see https://docs.ruby-lang.org/en/master/OpenStruct.html , which currently looks this way: <pre>class OpenStruct <here should be explanations> Public Class Methods</pre> require should be put above docs. I'd provide PR myself, but I kinda lost between core repository and https://github.com/ruby/ostruct (which seems outdated)?..
