

Ruby master - Bug #16953

Windows bash bin files removed in master

06/11/2020 06:36 PM - MSP-Greg (Greg L)

Status:	Open	
Priority:	Normal	
Assignee:		
Target version:		
ruby -v:	ruby 2.8.0dev (2020-06-11T15:55:31Z master 631c01f5ae) [x64-mingw32]	Backport: 2.5: UNKNOWN, 2.6: UNKNOWN, 2.7: UNKNOWN

Description

Master is not creating bash bin files for Windows builds, only files with extensions cmd or bat.

Although running Ruby from a bash shell in Windows is probably uncommon, some repo's CI can only be run from a bash shell. A good example is Bundler. With a correctly setup bash shell, it passes with Ruby 2.4 thru master. See <https://github.com/MSP-Greg/rubygems/actions/runs/131762536>

At present, I'm adding the files to ruby-loco's mingw & mswin builds (and also changing `#!/usr/bin/env ruby` to `#!/ ruby`), but having them installed natively would be helpful.
