

Ruby master - Feature #17099

Remove boolean argument and warning from Module#attr

08/02/2020 04:51 PM - S_H_ (Shun Hiraoka)

Status:	Open
Priority:	Normal
Assignee:	
Target version:	
Description	
Module#attr works as Module#attr_reader by default (since in 1.9.1). Its optional boolean argument is obsoleted, but it works as Module#attr_writer when its value is true.	
I think it's okay to remove the optional boolean argument and the warning from Module#attr.
