

Backport187 - Bug #3003

Segfault in vfprintf() using Ruby 1.8.7 p249

03/24/2010 08:21 AM - jamesotron (James Harton)

Status:	Open
Priority:	Normal
Assignee:	
Target version:	
ruby -v:	ruby 1.8.7 (2010-01-10 patchlevel 249) [x86_64-linux]

Description

=begin

I have a script that uses threadify to iterate over a few thousand activerecord models and post the data to an XMLRPC web service. After some time I get a segfault which gdb says is from vsprintf in libc, however I get the same segfault on OSX and Ubuntu. I have attached debug and backtrace information from both platforms.
