Backport186 - Backport #3403

A bug related to ruby's regular expression!!!!!!

06/07/2010 04:01 PM - naruse (Yui NARUSE)

Status:	Closed	
Priority:	Normal	
Assignee:	wyhaines (Kirk Haines)	

Description
=begin Backport r28192 I found a bug related to ruby's regular expression! puts(/wo{0,3}?/.match("woo")) This line of code should show a "w" on the screen, but my ruby shows "wo" on then screen. According to the principles of regular expression, this is a non-greedy match, so it should match 0 "o", but it matches at least 1 "o". I think this is a bug! I also tried this in the javascript language, it works well!("w" is shown) My ruby version is v1.8.7-p249. =end
