

Ruby master - Bug #4337

rubygems calls chdir directly, actions should be enclosed in a block

01/29/2011 01:44 AM - pyr (Pierre-Yves Ritschard)

Status:	Closed	
Priority:	Normal	
Assignee:	drbrain (Eric Hodel)	
Target version:	1.9.3	
ruby -v:	ruby 1.9.2p136	
Description		Backport:
<pre>=begin When installing gems, windows_stub_script is called in installer.rb which directly calls Dir.chdir. If this were to be called inside another Dir.chdir call with a block passed to it, it would spew warnings. Instead the proposed patch encloses the actions in a block, removing the need for saving and restoring a path around the chdir call. =end</pre>		

History

#1 - 01/29/2011 06:55 AM - drbrain (Eric Hodel)

- Status changed from Open to Closed
- Assignee set to drbrain (Eric Hodel)
- Target version set to 1.9.3

```
=begin
Unfortunately your supplied patch did not pass the tests.
```

I committed a different version which allowed the tests to pass to rubygems trunk. It will be imported when RubyGems 1.5 is released at the end of January.

```
=end
```

#2 - 01/29/2011 09:54 AM - drbrain (Eric Hodel)

```
=begin
This should be fixed in trunk now as well, please verify.
=end
```
