Revision ab86f1cf - 07/14/2011 05:41 AM - nahi (Hiroshi Nakamura)

- ext/openssl/ossl.c (ossl_verify_cb): trap the exception from verify callback of SSLContext and X509Store and make the verification fail normally. Raising exception directly from callback causes orphan resouces in OpenSSL stack. Patched by Ippei Obayashi. See #4445.
- test/openssl/test_ssl.rb (test_exception_in_verify_callback_is_ignored): test it.

#2 - 06/26/2011 06:44 PM - nahi (Hiroshi Nakamura)

- Target version set to 1.9.3

#3 - 06/26/2011 11:57 PM - nahi (Hiroshi Nakamura)

- Assignee changed from nahi (Hiroshi Nakamura) to MartinBosslet (Martin Bosslet)

Martin, can you handle this? Original reporter said that verify_cb does not use rb_protect to invoke a callback so an error raised from the callback passed directly to Ruby interpreter. Proposed patch looks good but we should check the rational of the current code (svn blame & svn log) and do some test around this.

#4 - 06/27/2011 08:23 PM - MartinBosslet (Martin Bosslet)

Yes, I'll look into it!

#5 - 06/28/2011 10:26 PM - nahi (Hiroshi Nakamura)

Note: #4611 and #4875 both crashes at ossl_ssl_verify_callback (1.9.2p274, 1.9.2p180.) I suspected this issue related to those issues.

#6 - 06/28/2011 11:46 PM - MartinBosslet (Martin Bosslet)

Thanks for the input, I will keep them in mind when investigating this!

#7 - 07/12/2011 06:24 PM - nahi (Hiroshi Nakamura)

Martin, how's the status? Can I take over this issue again? I think #4875 and #4611 relates to this issue.

#8 - 07/12/2011 11:34 PM - MartinBosslet (Martin Bosslet)

Sure - if you feel it's related to the other two issues then you are clearly in a better position to design this properly. Should I look into #4923 and #4961 instead? Or are there any other urgencies where I could help?

OK, I take this.

Do you think you can handle #4961? I don't think it's a release blocker since we just added tests which does not run with OpenSSL 0.9.7. It has not yet worked ever. But there could be a chance to find a easy way to fix the bug.

#11 - 07/13/2011 07:18 PM - MartinBosslet (Martin Bosslet)

I tried OpenSSL.decode on the PEM data and it was valid. I'll try my best, probably debugging it directly in C will show us what fails there.

So I will concentrate on #4961, and if I can solve that, I will continue on #4923. If I can help you with anything, please let me know!
