

Ruby master - Feature #5079

More removal of inadvertent symbol creation

07/23/2011 04:43 AM - jeremyevans0 (Jeremy Evans)

Status:	Closed	
Priority:	Normal	
Assignee:	jeremyevans0 (Jeremy Evans)	
Target version:		
Description		
As I mentioned in an update to #5072 , this removes inadvertent symbol creation for the following methods:		
class_variable_get instance_variable_get remove_class_variable remove_instance_variable remove_const method instance_method public_method public_instance_method		
It also fixes the NameError messages for the following cases (which were changed by r32621):		
Object.const_defined?("gadzooks1") Object.instance_variable_defined?("gadzooks2") Object.class_variable_defined?("gadzooks3")		
One new function is added to intern.h, rb_name_error_str, which is just like rb_name_error except it takes a VALUE instead of an ID.
