| <b>Target version:</b> 1.9.3  |                                 |
| <b>ruby -v:</b> 1.9.3-preview1  | <b>Backport:</b>                |
| <b>Description</b>  |                                 |
| Ran into a bug when using a gem called FactoryGirl. The bug has to do with how 1.9.3 handles handles module inclusion, scope, and method_missing.   |                                 |
| Here's a gist: <a href="https://gist.github.com/1119516">https://gist.github.com/1119516</a> Where method missing is called, it's because the module Another, while included and referencing Something::Another, doesn't find the method when it should. (quote joshuaclayton)      |                                 |
| If you need to dig in deeper to the specific issue, this github thread ( <a href="https://github.com/thoughtbot/factory_girl/issues/167#issuecomment-1706227">https://github.com/thoughtbot/factory_girl/issues/167#issuecomment-1706227</a> ) goes into greater background detail. |                                 |
