

Backport187 - Backport #5270

Date#freeze causes memoized Date methods to fail

09/03/2011 05:12 PM - ddfreyne (Denis Defreyne)

Status:	Closed	
Priority:	Normal	
Assignee:		
Description		
When freezing a Date object, memoized methods will fail because the memoized value cannot be stored on the frozen object. This is because memoized values are stored as instance variables on the object, and those are immutable for frozen objects.		
Attached to this bug report is a test case, as well as a patch that fixes the issue (and also includes the test case).		

History

#1 - 09/03/2011 05:13 PM - ddfreyne (Denis Defreyne)

- File *date-once.patch* added

Forgot to attach the patch.

#2 - 07/15/2019 05:00 PM - jeremyevans0 (Jeremy Evans)

- *ruby -v* deleted (*ruby 1.8.7 (2011-06-30 patchlevel 352) [i686-darwin10.8.0]*)

- Status changed from *Open* to *Closed*

- Project changed from *Ruby 1.8* to *Backport187*

- Tracker changed from *Bug* to *Backport*
