| Description | | |
| <p>When running my Rails 3.1 RSpec suite with the Spork gem I get a Segmentation Fault caused by the Random.rand method.</p> <p>The full debug output is attached. Sorry I have not been able to isolate the code to a minimum test case. Suggestions on reproducing with less code would be welcome.</p> <p>The offending code is in a Factory Girl factory definition:</p> <pre>trait :with_messages do after_create do mt user = FactoryGirl.create(:user) # To prevent creating 1 user per message FactoryGirl.create_list(:message, 1 + Random.rand(4), thread: mt, created_by: user) end end</pre> <p>Spork is loaded with: bundle exec spork rspec The fault occurs when the test run is executed with: bundle exec rspec spec It works fine when not running in the Spork process.</p> | | |

History

#1 - 11/23/2011 03:36 AM - Odaeus (Andrew France)

Sigh, sorry I appear to have used a bad formatter code and can't edit the ticket.

#2 - 11/23/2011 05:45 AM - normalperson (Eric Wong)

- File 0001-random.c-random_s_rand-avoid-segfault-after-fork-rub.patch added

Attached patch should fix it (test cases included).

git users: git pull git://bogomips.org/ruby.git random-fork

Until the next Ruby release, Spork can workaround this by using "rand(4)" instead of "Random.rand(4)"

#3 - 11/23/2011 11:20 AM - nahi (Hiroshi Nakamura)

formatting

#4 - 03/11/2012 04:52 PM - ko1 (Koichi Sasada)

- Category set to core

- Assignee set to nahi (Hiroshi Nakamura)

#5 - 03/12/2012 07:03 AM - nobu (Nobuyoshi Nakada)

- Status changed from Open to Closed

- % Done changed from 0 to 100

This issue was solved with changeset r34977.

Andrew, thank you for reporting this issue.

Your contribution to Ruby is greatly appreciated.

May Ruby be with you.
