Revision f21ac99e - 10/08/2012 04:40 PM - nagachika (Tomoyuki Chikanaga)

- `ext/zlib/zlib.c` (`zstream_run_func`): don't call `inflate()` when `z->stream.avail_in == 0`. it return `Z_BUF_ERROR`. but `deflate()` could be called with `z->stream->avail_in == 0` because it has hidden buffer in `z->stream->state` (opaque structure). fix for gem install error. [ruby-dev:46149] [Bug #7040]

Hiroshi, thank you for reporting this issue.
Your contribution to Ruby is greatly appreciated.
May Ruby be with you.

- ext/zlib/zlib.c (zstream_run_func): don't call inflate() when z->stream.avail_in == 0. it return Z_BUF_ERROR. but deflate() could be called with z->stream->avail_in == 0 because it has hidden buffer in z->stream->state (opaque structure). fix for gem install error. [ruby-dev:46149] [Bug [#7040](#)]
