

Ruby master - Bug #7771

method 'gets' crashed

02/02/2013 07:17 PM - jjyr (Jinyang Jiang)

Status: Rejected	
Priority: Normal	
Assignee:	
Target version: 1.9.3	
ruby -v: ruby 1.9.3p374 (2013-01-15 revision 38858) [i686-linux]	Backport:
Description method 'gets' crashed when pass arguments like "ruby test.rb hello" example #file test.rb only one method gets #end type "ruby test.rb" and enter will work well but "ruby test.rb hello" will crash In my machine(ubuntu 32): ruby test.rb hello test.rb:1:in gets': No such file or directory - hello (Errno::ENOENT) from test.rb:1:in gets' from test.rb:1:in `' 	

History

#1 - 02/02/2013 07:23 PM - charliesome (Charlie Somerville)

- Subject changed from method 'gets' crashed to method `'gets'` crashed

```
=begin
This is by design, (gets) will read from (ARGV) by default. If you want to read from the standard input even if there is a command line argument, use:
```

```
$stdin.gets
=end
```

#2 - 02/02/2013 07:23 PM - charliesome (Charlie Somerville)

- Status changed from Open to Rejected
