lib/rubygems/ext/builder.rb:22 removes dependency to ./RUBYARCHDIR.time, so lib directory creation task won't be run.	
thus for instance when tried to install rubyzip.gem which doesn't have lib directory, rubygem makes binary file "lib" not lib/zipruby.so.

Eric, could you handle this?

the following is a translation of this issue:

lib/rubygems/ext/builder.rb:22 removes dependency to ./RUBYARCHDIR.time, so lib directory creation task won't be run.

thus for instance when tried to install rubyzip.gem which doesn't have lib directory, rubygem makes binary file "lib" not lib/zipruby.so.

It should be fixed already.

Or it's not been backported?

Seems fixed by Nobu's patches, so I will close this.
