

Ruby master - Feature #8343

StringScanner#[] should accept names of named captures

04/28/2013 11:46 PM - rkh (Konstantin Haase)

Status:	Closed
Priority:	Normal
Assignee:	naruse (Yui NARUSE)
Target version:	
Description	
Example:	
<pre>s = StringScanner.new("Fri Dec 12 1975 14:39") s.scan(/(?<wday>\w+) (?<month>\w+) (?<day>\d+) /)</pre>	
<pre># this currently works s[0] # -> "Fri Dec 12 " s[1] # -> "Fri " s[2] # -> "Dec " s[3] # -> "12 "</pre>	
<pre># this currently does not work s[:wday] # -> "Fri " s[:month] # -> "Dec " s[:day] # -> "12 "</pre>	
I attached a patch including tests for MRI, I don't know if Rubinius has a different implementation, I guess JRuby has. I can look into this if the feature gets accepted.

History

#1 - 04/29/2013 02:45 AM - rkh (Konstantin Haase)

On a related note: should the patch be submitted in a second issue on the ruby-trunk project?

#2 - 04/30/2013 05:27 PM - naruse (Yui NARUSE)

- Status changed from Open to Assigned

- Assignee set to naruse (Yui NARUSE)

rkh (Konstantin Haase) wrote:

Here is also correct place now.
I'll merge this if there are no objection.

#3 - 05/24/2013 06:03 PM - naruse (Yui NARUSE)

- Status changed from Assigned to Closed

- Project changed from CommonRuby to Ruby master

Merged at r40881!
