Status: Closed	
Priority: Normal	
Assignee:	
Target version:	
ruby -v: ruby 2.0.0p247 (2013-06-27 revision 41674) [i686-linux]	Backport:
Description	
<p>This probably isn't the right place to report this, but I do not know a better one...</p> <p>The controller addresses for the various mailing lists do not seem to work anymore: ruby-talk-ctl@ruby-lang.org, ruby-core-ctl@ruby-lang.org, ...</p> <pre>Mail delivery failed: returning message to sender SMTP error from remote server after RCPT command: host: neon.ruby-lang.org 5.1.1 <ruby-doc-ctl@ruby-lang.org>: Recipient address rejected: User unknown in local recipient table</pre> <p>That means it's not possible to subscribe/unsubscribe right now.</p> <p>I already count about 450 failed subscribe/unsubscribe requests through the subscription form on www.ruby-lang.org.</p> <p>This started on 2013/08/06.</p>	

History

This can be closed.

Apparently the mailing list software was changed, the new "controller" addresses are ruby-talk-request@ruby-lang.org, etc.

The website should be updated, though: blade still reports that it's ctl.

The website should be updated, though

I updated the crucial information on <http://www.ruby-lang.org/en/community/mailling-lists/manual-instructions/>

However, I do not have the time to do a more thorough rewrite right now (this part of the site is not as concise as I would wish).

blade still reports that it's ctl.

I don't understand... :(

Sorry, by 'blade' i mean <http://blade.nagaokaut.ac.jp/cgi-bin/scat.rb/ruby/>

I see :) I hope you do not mind me elaborating further:

At the bottom of e.g. <http://blade.nagaokaut.ac.jp/ruby/ruby-talk/index.shtml>, the

- "Help for this mailing list",
- "Mail to Mailing List's Controller", and
- "Join This Mailing List"

links are outdated.

#6 - 09/15/2013 01:17 PM - matz (Yukihiro Matsumoto)

blade is not maintained by the ruby-lang.org admins, but individual.

I will ask him to fix, but don't expect too much. His activity has been low for long time.

Matz.
